Hello Captain Darrell Courts,
Our Halo Body Camera will soon have Facial Recognition Technology to help officers identify missing persons, fugitives, suspects, and people with outstanding warrants.
Please see our test video here:
https://www.dropbox.com/s/cg7usuzp1cxoif0/IMG_4890.MOV?dl=0
I'm sure many of you remember the kidnapping of teen Elizabeth Smart or the escaped prisoner Richard Lee Mcnair who convinced an officer that he was a jogger.
With Realtime Facial Recognition, WOLFCOM hopes to give our friends in Law Enforcement tools that will help them identify if the person they are talking to is a wanted suspect, a missing child or adult, or a person of interest. That's why we are working hard to add facial recognition to our Halo body cameras. We intend to have facial recognition available on the Halo camera within the next few months. If you are interested in Beta testing this new and exciting technology on your Halo body cameras, please reply to this email.

Sincerely,
Peter Austin Onruang, CEO
